

**Aviation Safety Investigation Report
198802422**

Gemini Thruster 503

20 December 1988

Readers are advised that the Australian Transport Safety Bureau investigates for the sole purpose of enhancing transport safety. Consequently, Bureau reports are confined to matters of safety significance and may be misleading if used for any other purposes.

Investigations commenced on or before 30 June 2003, including the publication of reports as a result of those investigations, are authorised by the CEO of the Bureau in accordance with Part 2A of the Air Navigation Act 1920.

Investigations commenced after 1 July 2003, including the publication of reports as a result of those investigations, are authorised by the CEO of the Bureau in accordance with the Transport Safety Investigation Act 2003 (TSI Act). Reports released under the TSI Act are not admissible as evidence in any civil or criminal proceedings.

NOTE: All air safety occurrences reported to the ATSB are categorised and recorded. For a detailed explanation on Category definitions please refer to the ATSB website at www.atsb.gov.au.

Occurrence Number: 198802422

Occurrence Type: Accident

Location: Inverell North Airfield NSW

Date: 20 December 1988

Time: 1810

Highest Injury Level: Nil

Injuries:

	Fatal	Serious	Minor	None
Crew	0	0	1	1
Ground	0	0	0	-
Passenger	0	0	0	0
Total	0	0	0	1

Aircraft Details: Gemini Thruster 503

Registration: 25-0091

Serial Number: N/A

Operation Type: Sport Aviation

Damage Level: Substantial

Departure Point: Inverell North NSW

Departure Time: 1700

Destination: Inverell North NSW

Approved for Release: 27th October 1989

Circumstances:

The aircraft departed the airfield in calm conditions and flew to a point about 35 kilometres to the south-east. On his return the pilot positioned the aircraft to land on runway 09. The aircraft was struck by a strong wind gust which lifted the right wing and caused the aircraft to veer to the left. The pilot was unable to regain directional control before the aircraft collided with a boundary fence. The wind was reported to be variable in direction at five to ten knots. This accident was not the subject of a formal on-scene investigation.
